GLASGOW

Objectives

- To provide an introduction and overview of the Scottish economy
- To describe the evolutionary path of the models of economic development in Scotland from 1975 onwards

Sources

- Official Statistics
- <http://www.scotland.org/facts/>
- <http://www.scotland.gov.uk/Topics/Economy/Scotlands-Economy>

Some Key Facts (2009/10)

- **Population : 5.2 million**
- **Total Area: 78,772 sq km**
- **GVA £102 billion**
- **GVA (per head)) £19,744**
- **Labour Force 2.49 million**
- **Top Five Export Industries:**
 - Food & drink
 - Chemicals
 - Business services
 - Electrical and instrument engineering
 - Mechanical engineering
- **Top Five Export Markets**
 - USA
 - Netherlands
 - France
 - Germany
 - Belgium

Scotland's Cities

Glasgow - 592,820

Edinburgh - 486,120

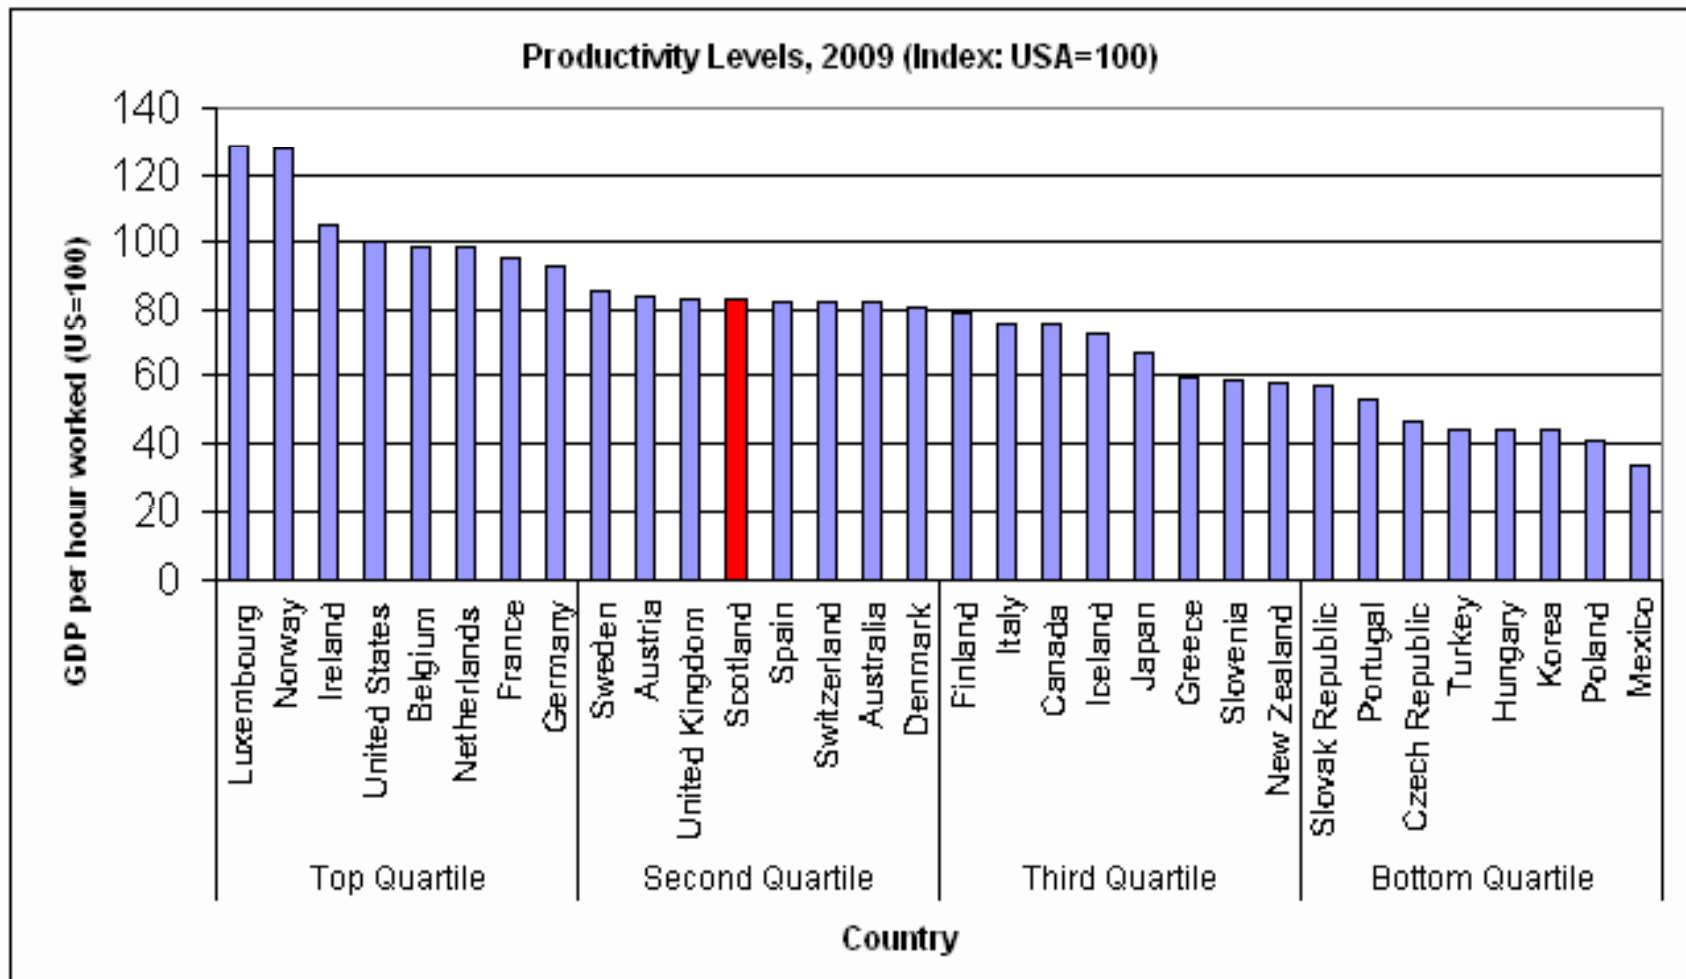

Aberdeen - 217,120

Dundee - 144,290

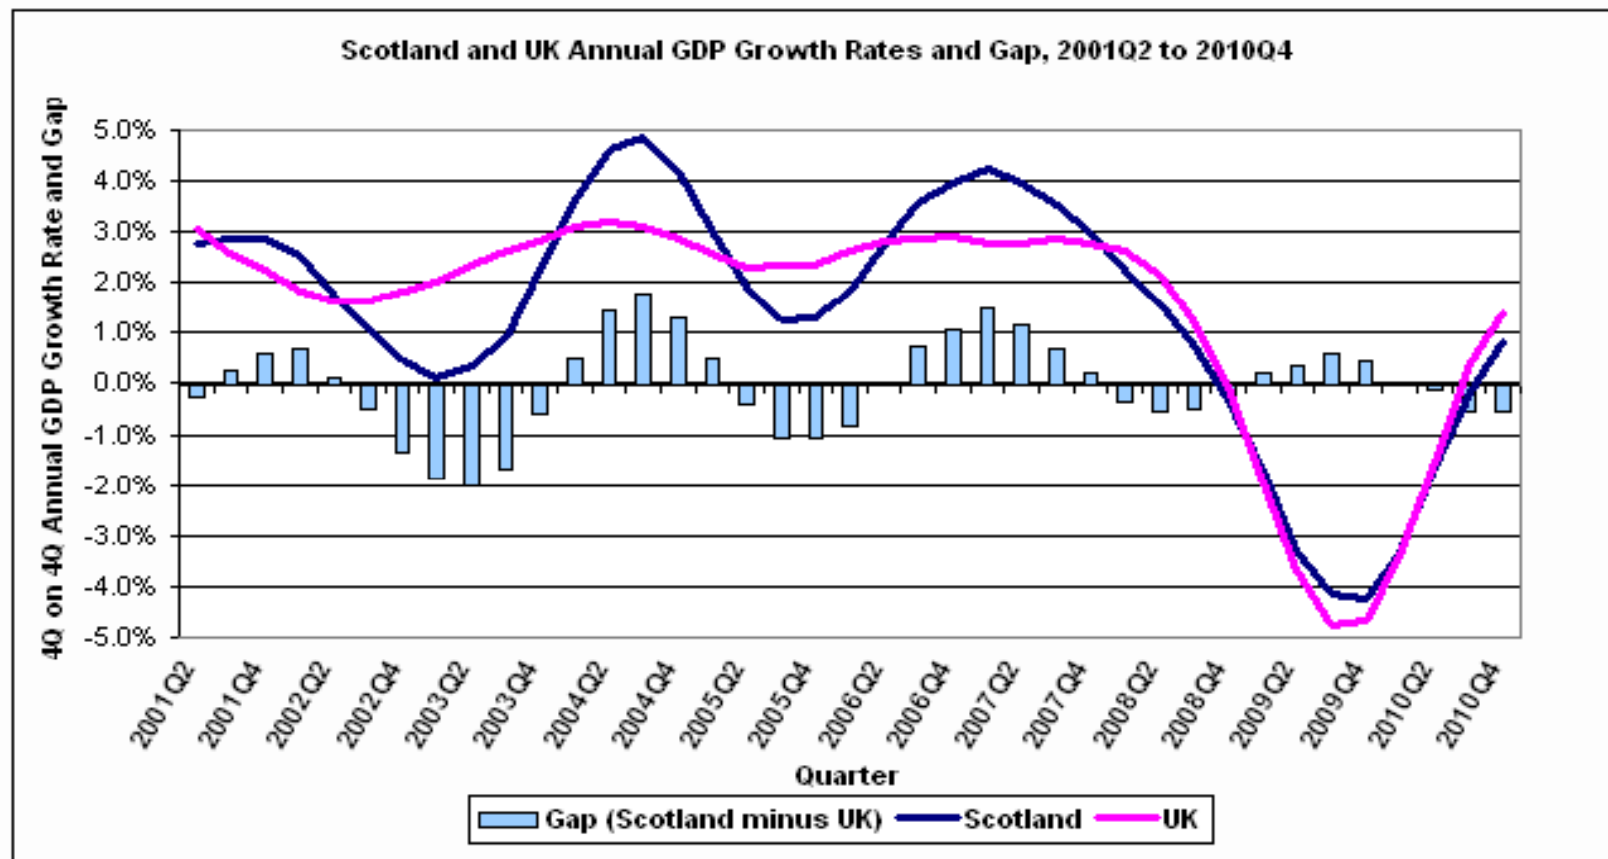

Inverness - 56,660

Stirling - 89,850

Above Average Productivity Levels Compared with Leading OECD Members

GDP Growth: Can Reach Higher Rates but More Volatile than UK as a whole

Headline Figures (2008)

“Services Dominate”

- Gross value added (GVA) in the **services sector** amounted to £43 billion, compared to £14 bn in **manufacturing** and £7 bn in **construction** sectors.
- **Remaining sectors** accounted for £27 bn (dominated by £22 bn for oil and gas, which includes off-shore activity).
- Turnover in the **services sector** amounted to £119 bn, compared to £45 bn in **manufacturing** and £17 bn in **construction** sectors.
- **Remaining sectors** accounted for £55 bn (dominated by £34 bn for oil and gas, which includes off-shore activity).

Headline Figures Cntd.

Scotland's Share of UK Totals:

- **Scottish manufacturing** accounted for around 8.6% of total **UK manufacturing** in terms of turnover and GVA.
- **Scottish services** were around 5.4% for turnover and 7.1% for GVA.
- Equivalent figures for **Scottish construction** sector were around 8.3% for turnover and 9.5% for GVA.

Per Employee Comparisons:

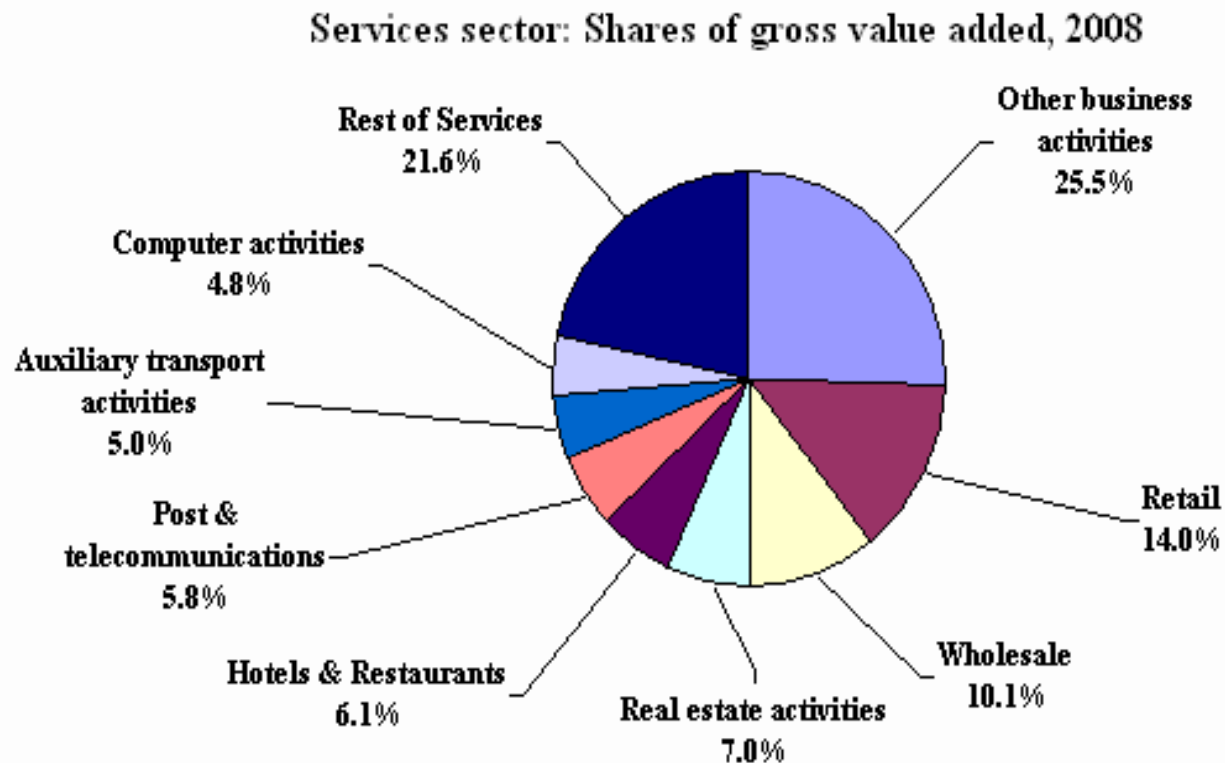

- GVA per employee in **manufacturing** (£66,900) was twice as high as that in the **services sector** (£33,300).
- Labour costs per employee in **manufacturing** (£32,000) were around 50% higher than in **services** (£21,500).
- In part, differences reflect the higher level of part time working in the **services sector**.

Food and Drink, Chemicals and Metal Fabrication account for 50% of Manufacturing GVA

Manufacturing sector: Shares of gross value added, 2008

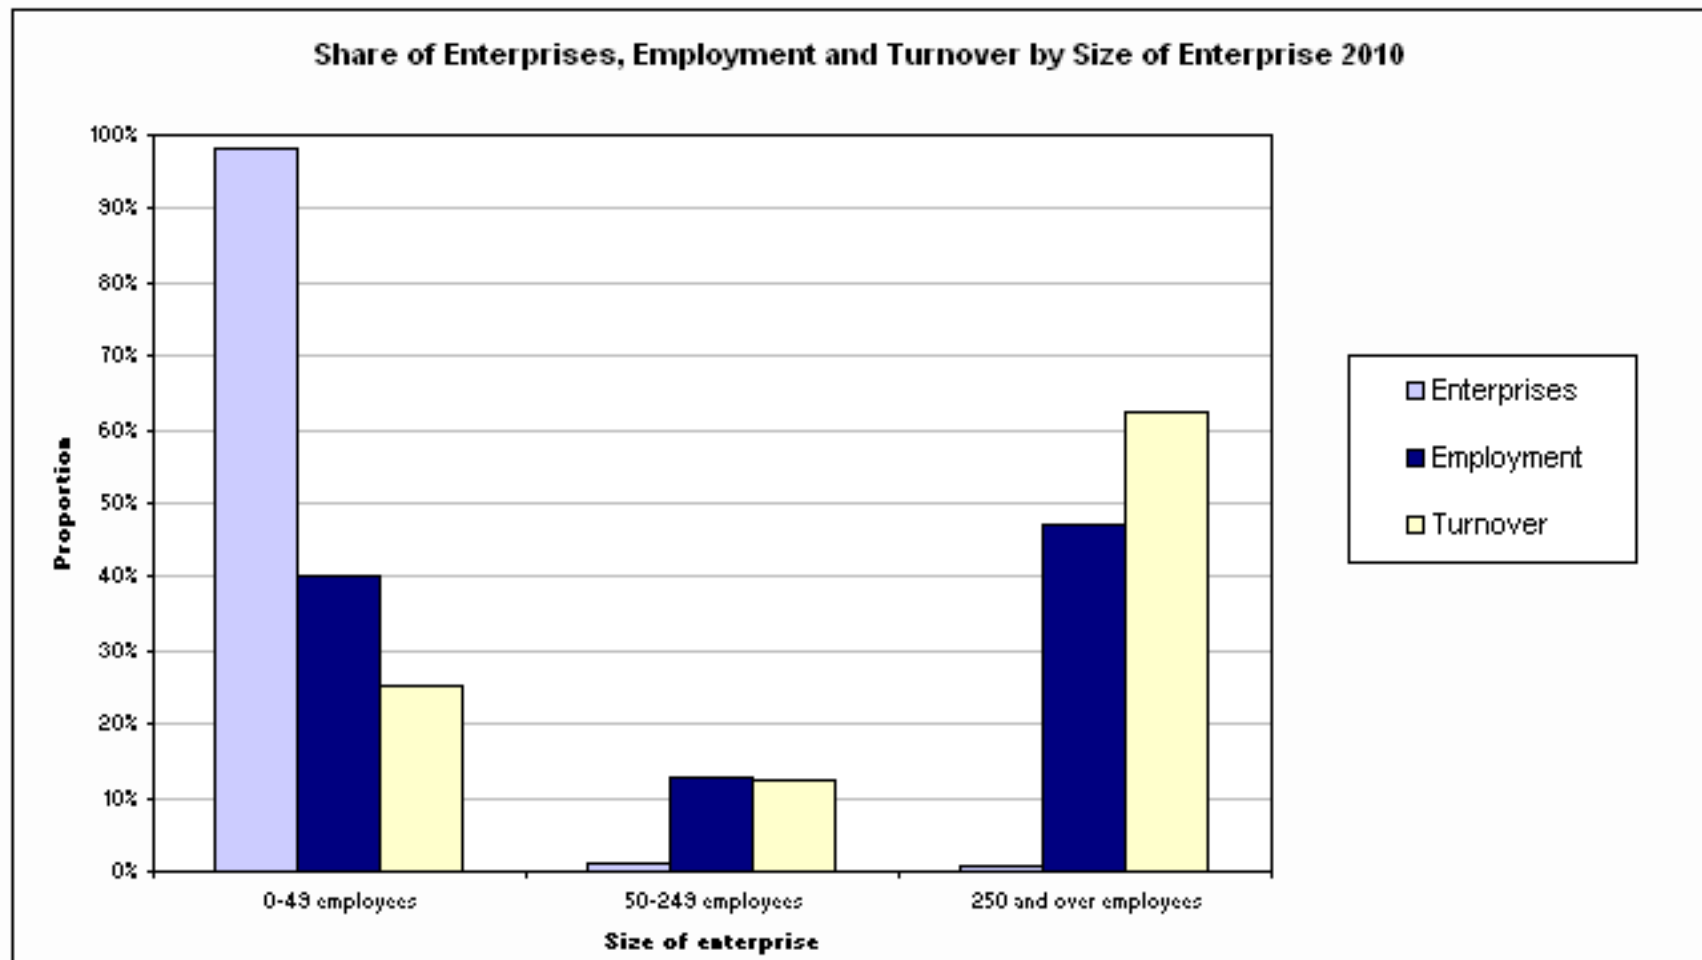

Business Services, Retail and Wholesale account for around 50% of Service-related GVA

Note: Services coverage excludes certain areas such as the financial sector and some of the public sector

Mid-sized Businesses?

Foreign Ownership

Shares of Gross Value Added and Employees by sector and ownership, 2008

Note: Services coverage excludes certain areas such as the financial sector and some of the public sector

Foreign-ownership Cntd.

Per Employee Comparisons:

- GVA per employee for **foreign manufacturing** companies (£82,000) was 65% more than GVA per employee for **Scottish-owned** firms (£49,700).
- Labour costs per employee were 44% higher in **foreign manufacturing** firms (£39,200) than in **Scottish-owned** companies (£27,300).
- GVA per employee for **foreign services** firms (£52,100) was 90% more than GVA per employee for **Scottish-owned** companies (£27,500).
- Labour costs per employee were 21% higher in **foreign services** firms (£25,400) than in **Scottish-owned** companies (£20,900).

Export-led Growth

- History highlights this as a recurring theme in Scotland's economic growth and development
- This is true of development patterns in the 18th, 19th and 20th centuries
- Top exports through the ages

Treaty of Union in 1707: New Single Market Created

- Customs barriers dismantled (e.g. linen, coal, salt)
- Single currency (but different bank notes)
- Single system of taxation
- Common economic policy
 - One off payment to Scotland for sharing England's National debt
 - Annual “arising equivalent” – compensation equal to the increase in customs and excise revenue from Scotland paid for next 7 years

1707: The Treaty of Union

UNIVERSITY
of
GLASGOW

- Scottish Parliament disappeared
- 45 Scottish seats out of 558 in the House of Commons ;
16 Scottish peers added to House of Lords
- Scottish distinctives remained : own legal system, own Church; own education;
- *But 15 of the 25 articles concerned with economic matters.*
- In Scotland motives for the Treaty viewed as mixed and generally unpopular:
- "The Union was, in fact, carried by the Parliament, with the assistance of the Church, against the country"

Scottish Exports Boomed

- **Access to English Markets**
 - 1701: 14,000 cattle exported
 - 1720s: 30,000 cattle exported
 - 1750s: 50,000 cattle exported
 - 1790s :100,000 cattle exported
- .
- .

Scottish Exports Boomed Cntd.

- **Access to American Colonies**
 - 1775: Tobacco comprised 38% of Imports and 56% of exports (Glasgow Tobacco Lords)
 - Linen exports grew from 1.85 million yards in 1743 to 6.99 million yards in 1790s
 - In Glasgow, manufacturers, shippers and traders made fortunes from import and export trade especially in tobacco and sugar

Heavy Industry at the Heart of Scotland's Economy

By 1907

- 11.2% of Scottish output based on minning and quarrying (local splint coal and iron ore with high phosphorous content) (8.4% UK)
- 30.6% of output based on iron, steel, engineering and shipbuilding (21.7% UK)

By 1913

- Over 100,000 people were working in 38 shipyards and related industries along the Clyde.
- Over half of world shipbuilding production was in Glasgow and
- Glasgow was known as the "Second City" and "Workshop" of the British Empire

Queen Elizabeth 2

From Ships to Chips (ICs)

UNIVERSITY
of
GLASGOW

- By 1996 “Silicon Glen” was producing
 - 35 % of Europe's PCs
 - 65 % of Europe's ATMs
 - 12 % of the world's semi-conductors
 - Employed 55,000 directly
- But “Monitor Report” had already warned Scotland could lose up to 18,000 jobs in electronics through transfer to low-cost production centres in the Far East

Scottish Manufacturing 1979-2001: Total Turnover at SIC92 Industry Group level

Source: Scottish Production Database (SPD)
& Annual Business Inquiry (ABI)

Model 1: SDA (1975-1980)

- *Investment in industry*
 - (equity - £12m; loans £10.1)
- *Provision of factories*
 - (owned 731, built 265, sites 192)
- *Derelict land Clearance*
 - (over 1200 schemes, over £100 million invested)
- Urban Renewal (GEAR)
 - £40 million commitment
- *Support for Small Business*

Model 2: SDA 1981-91

- *Promotion and Attraction of Inward Investment* (One-stop shop created –Locate in Scotland)
- *Sector initiatives extended* (electronics, healthcare, biotechnology, forest products, oil-related engineering, advanced engineering)
- *Integrated area projects* (innovative approaches to urban and town renewal)
- *Investment* (Tighter Control)
- *Factory Provision* (Portfolio Privatised and Role More Limited)
- *Government policy* - greater emphasis on partnership with private sector and achieving leverage on spend

Model 3: Scottish Enterprise 1991-1999

- Merger with the Training Agency
- Creation of 13 LECs (Each under Private Sector Leadership) –
- LECs spend £381mn out of SE Total £446mn
- Retention at Centre (SEN) of
 - National Focus (e.g. Sector/cluster teams, flagship projects/initiatives)
 - Plus Full responsibility for FDI Promotion, Attraction and Trade Promotion
 - FDI Retention/Upgrade added (aftercare)
- Model 4: Scottish Enterprise in Post Devolution Scotland (JMCF)

Re-creation of the Scottish Parliament

Economic Regeneration: The City Perspective
